Russell L. Renner, P.E., S.E.
County Engineer

PROJECT INFORMATION SHEET

- Project Type:** Recy/Chip & Seal (Recycle plus a Chip and Seal)
- Description:** Work includes recycling the existing roadway, including the application of a stabilizer, re-grading, followed by the application of a chip and seal surface.
- Schedule:** Work is completed between June and September.
- Traffic impact:** Full road closures will be required for the section of road that will be worked on each day; however, the road will be open to traffic at the end of each work day so there should be no overnight closures. The county will do their best to provide access to properties along the section of road that is being repaired; however, we highly encourage travelers to avoid driving through the construction zone, if at all possible. Both the prime (oil placed on road prior to seal coating operation) and the oil for the seal coating operation can be difficult to remove from vehicles so please avoid driving on the road after oil had been applied. If you must, drive slowly.
